Austin,
Texas

Mom and Student

Mom (Always):

I took time away to aid in the at-home therapy for my autistic son. During that time, I worked with a team of behavior analysts to teach my son empathy, social cues and etiquette, and cause and effect at our home for 30-35 hours a week.

UI/UX Student (Jan 2018 - Present):

I enrolled in the Austin Community College UI/UX Designer program. In this program, I have explored design thinking, user research, prototyping, and common design patterns.

Web Developer and Designer

UI Developer (May 2013 - Jan 2015):

As UI Developer for Doubleline Partners, I wireframed, mocked, and developed UIs for software that aided teachers to identify at-risk students based on course and test metrics.

Freelance Web Designer (Jan 2010 - April 2013):

As a freelance web designer, I designed websites to increase online visibility for small business owners. I worked with clients to determine site requirements, designs, schedule, and delivered websites that reflected the clients' aesthetics.

Operational Tester:

Product Manager (Jan 2009 - Nov 2010):

I was the product manager for an army simulation system that replicated Army intelligence data and battlefield models. I worked with a team of engineers to plan sim features and development.

Technologist (May 2007 - Jan 2009):

I worked with test teams to support testing equipment in the field using simulations to replicate digital battle scenarios for Army command and control systems.

Intern (May 2005 - May 2007):

I learned the principles behind testing military in the hands of soldiers in the field as part of the Army Operational Test Command.

Skills

HTML, CSS, JavaScript, Sublime Text 2, Adobe Creative Cloud, Node.js, Sketch, Invision, Strong Written and Oral Communication, Agile methodologies

Education

Austin Community College -
Presently Enrolled, Associates,
UI/UX Design

University of Mary-Hardin
Baylor -
Bachelor of Science,
Computer Science and minor
in Graphics and Design
